Medical Solution

Semi-automatic External Defibrillator

can save life when a heart arrest happens

Real-time
battery status

Smart Biphasic Truncated
Exponential shock waveform

7" HD Screen

Voice and visual instructions
guide the rescuer through
the entire defibrillation process

Portable &
lightweight
(2.5kg)

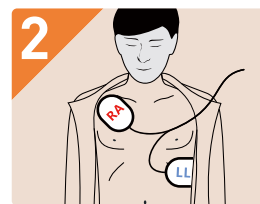

CE 2797 EN1789 RTCA/DO-160G

Features

- 7"HD display
- Biphasic Truncated Exponential (BTE) Shock Waveform
- High capacity and long-life lithium manganese dioxide battery, minimum 200 shocks, 5-year life
- Visualized status of battery and system
- Detailed voice instructions and illustrations makes rescue easier
- Automated tracking
- Data storage of 24-hour ECG and up to 1000 events
- Deliver a 200J shock to adults and 50J shock to pediatric
- Daily self-tests, report device status in time, ideal for remote management

Turn ON the AED

Apply AED pads

Follow the voice instructions and deliver a shock
