

Semi-automatic External Defibrillator

Compliance with ERC/AHA guidelines

QUANTUM
Medical Solution

Semi-automatic External Defibrillator

can save life when a heart arrest happens

Real-time
battery status

Voice and visual
instructions guide the rescuer
through the entire
defibrillation process

Smart Biphasic
Truncated Exponential
shock waveform

Portable &
lightweight (2.3kg)

Turn ON the AED

Apply AED pads

Follow the voice instructions and deliver a shock

CE 2797 EN1789

Features

- High capacity and long-life lithium manganese dioxide battery, minimum 200 shocks, 5-year life
- Visualized status of battery and system
- Detailed voice instructions and illustrations make rescue easier
- Automated tracking
- Data storage of 24-hour ECG and up to 1000 events
- Deliver a 200J shock to adults and 50J shock to pediatric
- Daily self-tests, report device status in time, ideal for remote management
- One electrode pad for both adult/child (optional)
